

ZAID ALOTWALA

PHP / LARAVEL DEVELOPER

About Me

I am a dedicated PHP developer with hands-on experience in building web applications using PHP, Laravel, MySQL, JavaScript, and Bootstrap. I have developed real projects like real-estate website using PHP and a car rental platform using laravel which helped me improve both front-end and back-end skills. I follow clean coding practices, work confidently with Laravel's MVC and REST APIs, and use GitHub for version control. I enjoy working in a team, take responsibility for my work, and stay eager to learn new things.
